

TRANSFER CATALOGUE

UNLEASH THE COLOR

WITH OUR TRANSFERS ...

... you can print any design in seconds. The entire color spectrum is available to you, even the most complex color transitions are possible. No limits, with endless possibilities! All of this can be implemented without large investments or production areas. Find a seat at home, plug in your heat press and start making money today! Simply place the shirt of your choice on a heat press, position the transfer and print it. The result: a high-quality textile print that is guaranteed to last as long as the textile you have printed on. Transfers lets you print on t-shirts, hoodies, pants, shoes, totes, bottle coolers and more!

The diversity of STAHL'S' transfers makes it possible to decorate a wide variety of products.

FULL COLOR

UltraColor™ Transfer

This transfer technology **combines digital printing with classic screen printing** to produce a transfer that offers the best of both worlds: the feel and durability of a screen printed transfer with the color variety of a digital print.

SCREEN PRINTED

Universaltransfer Plus

Screen printed transfers, also known as plastisol transfers, are made using plastisol on a **special backing paper or foil** instead of a garment printed. When used properly, screen printed transfers will last the entire lifespan of garment.

DIRECT TO FILM

UltraColor™ MAX Transfer

Our **digitally printed direct to film transfer** is the solution for high-volume graphics number of colors and gradients. A matte finish with sharp edges, fine Details and a soft feel that characterize DTF Transfers.
